

ABDELRAMAN SANDID

FULL STACK DEVELOPER

KEY PROJECTS

University Group Project Jan 2025 – June 2025
Internal AI Chatbot (NKT Cables)

Collaborated within an agile team to engineer a custom AI chatbot for NKT Cables. Designed the tool to help employees plan faster by instantly retrieving the data they need, replacing manual search processes.

Productivity Task Manager Aug 2025 – Sep 2025
Full Stack Developer

Engineered a full-stack productivity tool with Next.js, implementing server-side rendering, robust CRUD operations, and secure database integrations to optimize user task management

Movie Discovery App Oct 2025 – Dec 2025
Frontend Developer

Built a dynamic movie discovery app using the TMDB API, prioritizing advanced React patterns and reusable components to create a responsive, cinematic user experience.

Smart AI Assistant Integration Dec 2025 – Jan 2026
Full Stack Developer

Engineered a versatile AI application using React and Express.js. Integrated the OpenAI API to power two key features: an interactive chatbot for real-time user assistance and an automated tool that summarizes complex customer reviews into actionable insights.

SKILLS

Languages:

- JavaScript (ES6+), TypeScript, Python, HTML5, CSS3.

Frontend Development:

- React, Next.js, Tailwind CSS, Shadcn/Radix UI, Zustand, React Hook Form.
